The SCT Approach

The SCT Approach is based on the following principles:

* **Substance use disorders are a chronic, relapsing disease.** * *

Treatment should be tailored to the individual needs of the person. *

****Treatment should be provided in a supportive and recovery-oriented environment.****

The SCT Approach consists of the following four components:

*** **Screening and assessment:**** This component involves screening individuals for substance use disorders and assessing the severity of their symptoms. *** **Intervention:**** This component involves providing individuals with the necessary support and services to help them reduce or stop their substance use. *** **Continuing care:**** This component involves providing individuals with ongoing support and services to help them maintain their recovery. *** **Prevention:**** This component involves preventing substance use disorders from developing in the first place.

The Practitioner's Manual

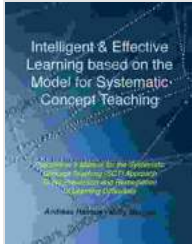

This manual provides practitioners with the following:

* A detailed overview of the SCT Approach * Step-by-step instructions for implementing the SCT Approach in your own work * Case studies and examples * Resources and tools

This manual is an essential resource for practitioners who are working with individuals with substance use disorders.

The SCT Approach is a comprehensive, evidence-based approach to the prevention and remediation of substance use disorders. This manual provides practitioners with the tools and knowledge they need to implement the SCT Approach in their own work.
